

WHY PAY MORE FOR COOKING FUEL?

Many families spend a lot of money on charcoal, firewood, gas and kerosene. The cost keeps increasing, making cooking more expensive.

We produce briquettes from agricultural waste materials. Briquettes cook just like charcoal, but they are often cheaper and cleaner to use.

BENEFITS OF BRIQUETTES

- ✓ Less smoke during cooking.
- ✓ Lower cooking fuel expenses.
- ✓ Cleaner kitchen.
- ✓ Easier to store.
- ✓ Made from local materials.

Many women are already switching to briquettes because they help save money while still cooking meals properly

Buy today and see the difference yourself!

Available in Abeokuta, Ijebu-Ode and Odeda, Ogun State
